

### **Vishay Semiconductors**

## **Surface Mount ESD Protection Diodes**

#### **Features**

- For surface mounted applications
- · Low-profile package
- Optimized for LAN protection applications
- Ideal for ESD protection of data lines in with accordance **IEC** 61000-4-2 (IEC 801-2)

- IEC 61000-4-2 (ESD) 15 kV (air) 8 kV (contact)
- · Low incremental surge resistance, excellent clamping capability
- · 200 W peak pulse power capability with a 10/1000 µs waveform, repetition rate (duty cycle): 0.01 %
- Very fast response time
- High temperature solderina guaranteed: 260 °C/10 s at terminals
- AEC Q101 qualified
- · Lead (Pb)-free component
- Component in accordance to RoHS 2002/95/EC and WEEE 2002/96/EC
- Halogen-free according to IEC 61249-2-21

### **Mechanical Data**

Case: JEDEC DO-219AB (SMF®) plastic case

Terminals: Solder plated, solderable per

MIL-STD-750, method 2026

Polarity: The band denotes the cathode which is positive with respect to the anode under normal TVS operation

Mounting position: any

Weight: approx. 15 mg

### Ordering Information/Packaging Codes

SMF5V0A-GSxx	
GS08 = 3K p GS18 = 10K Part number	per 7" reel (8 mm tape) ( per 13" reel (8 mm tape)

### **Absolute Maximum Ratings**

T<sub>amb</sub> = 25 °C, unless otherwise specified

amb	<u>'</u>			
Parameter	Test conditions	Symbol	Value	Unit
Peak pulse power dissipation	10/1000 μs waveform <sup>1)</sup>	$P_{PPM}$	200	W

### **Vishay Semiconductors**

### **Ozone Depleting Substances Policy Statement**

It is the policy of Vishay Semiconductor GmbH to

- 1. Meet all present and future national and international statutory requirements.
- 2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

- 1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
- 2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
- 3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.

Vishay Semiconductor GmbH, P.O.B. 3535, D-74025 Heilbronn, Germany
